

M/S SUNWORLD 6

SUNWORLD 6 (maximum 14 guests) was completely refitted in 2010 to bring it up to a high standard. A classically designed 29 metres yacht, the interior is light pine. There are 7 cabins – 3 double bedded cabins aft and forward 4 cabins with a double and single bed each. The en suite bathrooms all have shower cubicles and electric toilets. The air conditioning in the cabins and saloon is switched on for a few hours after lunch for siesta and again during dinner to cool cabins for sleeping, it does not run 24 hours. Guests usually dine outside on the aft deck under the shade of a sun awning, and for cooler evenings there is also a dining area in the saloon. Sun awnings cover the deck for shade and there is plenty of space for everyone to sunbathe comfortably. The captain and three crew members have their own quarters.
